

RSW-2

The multitasking Silo Weighing system

Poultry growers can control feeding procedures in their poultry houses simply and effectively with Rotem's **RSW-2**, the versatile & automatic silo weighing system.

Benefits:

- Program for breeders & pullets: RSW-2 manages the entire restricted feeding procedure, distinguishing males from females, and distributing accurate quantities of feed to each feeding line at preset times.
- RSW-2 monitors feed consumption, measuring quantities consumed per hour and per day.
- Automatic activation of delivery augers, feeders, lights & alarms.
- Automatic registration of feed deliveries, including quantity, date and time.
- Crucial daily data collected, saved & displayed throughout the growth cycle – regarding feed & water consumption, live animal weight, feed conversion and bird mortality.

Main features:

- Programs for breeders & broilers
- Restricted feeding program
- Separate programs for female & male breeders
- Up to 10 feeding cycles per day
- Controls:
 - + Up to 2 feeding augers
 - + Up to 16 feeding lines – 8 for females & 8 for males
 - + Silos - Up to 12 load cells
 - + Lights - Up to 10 lighting times per day
 - + Alarm output
- Measures:
 - + Feed consumption
 - + Water consumption
- Automatic registration of feed deliveries
- Skip-a-day function
- LCD display: 2 X 20 characters
- Feeding curve
- Multiple operating modes
- PC communication for Windows
